

ROHIT GURNANI

711 University Dr, College Station, TX 77840
Phone: +1 (864) 4783053 | Email: rohitgurnani233@gmail.com
<https://www.linkedin.com/in/rohitgurnani/>

Education:

Texas A&M University – College Station, TX
Master of Computer Science

Aug 2025 - May 2027

Texas Tech University, Lubbock – TX
Bachelors of Science in Computer Science | Minor in Mathematics

Aug 2018 - May 2022

Experience:

Nordstrom | Seattle, WA

Engineer 2

Engineer 1

April 2024 - May 2025

June 2022 - April 2024

- Built and maintained recommendation APIs and microservices (Node.js, Python, AWS Lambda) powering personalization across web, mobile, and email
- Led migration to API Gateway, improving service security and coordinating cross-team privacy/security reviews
- Modernized backend infrastructure by upgrading runtimes, standardizing CI/CD pipelines, and automating deployments with Terraform
- Improved observability and reliability using Splunk logging, New Relic dashboards, and alerting, reducing incident response time
- Developed React-based recommendation components and implemented CTR tracking to enhance user engagement
- Launched new features (e.g., size filtering, tray variants) and A/B tests via Optimizely, driving measurable conversion improvements

Bayer U.S. | Indianola, PA

Software Developer Intern

May 2021 – Dec 2021

- Worked on the Bayer Digital Diagnostics Radiology Product Radimetrics 3.3 Release
- Worked on Components such as Peak Skin Dose that creates a Skin Dose map of patients with metrics
- Performed Agile Software Development Methodologies and worked on all aspects of Software Development Life Cycle

Bayer U.S. | Indianola, PA

Software Developer Co-op

June 2020 – Dec 2020

- Worked on the Migration of Bayer Digital Diagnostics Product Radimetrics from Flash to React.js
- Used React.js for front-end development, Java for Back-end Development and Mercurial for Source control
- Performed Testing, Debugging and all other tasks as assigned on Jira

Projects:

Image Research Assistant

- Developed an image research assistant with a Gradio-based UI that lets users upload images and receive summarized insights from relevant articles and sources
- Designed a multi-agent workflow using two MCP servers—one for visual analysis and another for Wikipedia research—to orchestrate automated retrieval and contextual summarization

PromptGuard

- Built an LLM security evaluation and defense framework to detect and mitigate prompt injection attacks across multiple models (GPT-4o-mini, GPT-5-mini)
- Designed and implemented 8+ adversarial attack scenarios, including instruction override, data exfiltration, and jailbreak-style prompts, to systematically benchmark model vulnerabilities
- Developed custom evaluation metrics such as Semantic Deviation Score, Leakage Severity Score, and Defense Precision/Recall to quantify model robustness
- Integrated multi-model testing pipelines and automated evaluation workflows to compare baseline vs defended responses

Technical Skills:

- Languages: Python, JavaScript, C/C++, Java, HTML, CSS, SQL
- Tools and Frameworks: React.js, Node.js, AWS, GitLab CI/CD, Terraform, Apache Kafka, Airflow, Splunk, New Relic, Jira, GitHub Copilot
